

Franklin School

Summer Learning

Hello Families,

We have just completed our 2nd week. We are making progress every day! Students are actively engaged in opportunities to collaborate, think critically, be creative, and communicate purposefully each day!

~Ms. Cobb

Weekly Highlights

Rising 1st graders created and illustrated fairytales. They also worked on learning new vocabulary words such as "welcome," "comfort" and "furious." Last but not least, the students have daily I-ready and recess time.

Rising 2nd and 3rd graders shared accomplishments they were proud of after reading "The Day of Ahmed's Secret". They also learned how sneezing spreads germs and how Earth's surface changes over time. Last but not least, they worked on building their number sense through number talks.

Rising 4th and 5th graders explored the ways we use water in our everyday lives and how they can conserve this limited resource. In addition, students worked on learning how to tie both bowline and figure eight knots, after reading "The Top of the World: Climbing Mount Everest". They also learned how to create coded messages to communicate with the famous mythological creature, thought to live on Mount Everest, the Yeti. Last but not least, they worked on building their number sense through number talks.

Friday Fun Day students of all ages engage in social emotional activities such as yoga, technology programs, arts & crafts, board games, basketball skills and cheerleading drills. Last but not least, the students end their day with PIZZA for lunch!

We are proud to serve your children this summer & look forward to their continued participation!
